

Rota-Pak Compactor

The Rota-Pak Compactor is designed with an auger blade to provide superior and more hygienic compaction of wet waste, paper, cardboard and other general waste.

The Rota-Pak can be designed for hand, bin lifter, tippler bin and chute loading. The superior compaction of the auger blade, provides high payloads to reduce your carbon footprint. When full, the entire unit is removed for emptying.

Technical Specifications

Swept Volume	1.0 m ³
Machine Capacity	120 m ³ /hr
Clear Top Opening (WxL)	1300 x 1000 mm
Container Penetration	350 mm
Electric Motor Size	7.5 kW
Cycle Time	Continuous
Maximum Compaction Force	19 kNm (Torque)
Power Required	415V 20A

Custom designed from inception to installation by your own allocated Project Manager

24/7 National Service and Support with remote dial-in for efficient and effective service and diagnostic back-up

20 years of experience delivering and designing solutions for the waste and recycling industry
