

# T1000 Compactor

**WASTECH**  
ENGINEERING

**The T1000 Transportable Compactor is specifically designed for heavy and rapid loading of wet and food type wastes.**

The compaction head of the T1000 is joined directly to the container to ensure wet waste is completely contained. The T1000 can be designed for hand, bin lifter, tippler bin and chute loading. When full, the entire unit is removed from site for emptying.

## Technical Specifications

<b>Swept Volume</b>	1.0 m <sup>3</sup>
<b>Machine Capacity</b>	90 m <sup>3</sup> /hr
<b>Clear Top Opening (WxL)</b>	1500 x 1000 mm
<b>Hydraulic Cylinder Size</b>	2x 102 mm
<b>Container Penetration</b>	355 mm
<b>Electric Motor Size</b>	5.5 kW
<b>Cycle Time (unloaded)</b>	40 s
<b>Hydraulic Pump Flow</b>	20 L/min
<b>Normal Compaction Force</b>	158 kPa
<b>Maximum Compaction Force</b>	196 kPa
<b>Maximum Hydraulic Pressure</b>	180 bar
<b>Power Required</b>	415V 20A

**Custom designed** from inception to installation by your own allocated Project Manager

**24/7 National** Service and Support with remote dial-in for efficient and effective service and diagnostic back-up

**20 years** of experience delivering and designing solutions for the waste and recycling industry
